

txtForward for Blackberry

txtForward automatically forwards a copy of your SMS or PIN messages to any email address or mobile number you provide and you can reply to them straight from email too.

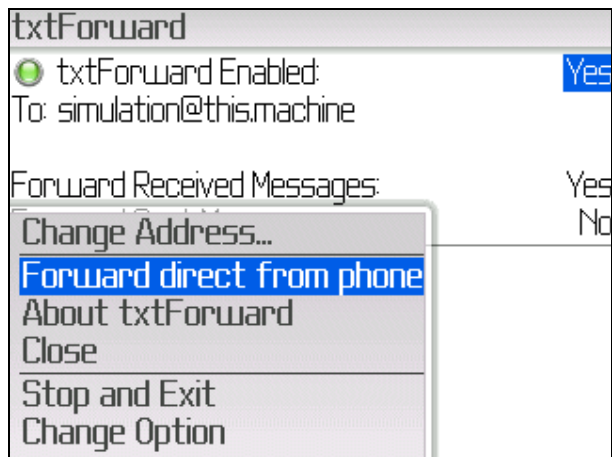

You can forward both incoming and outgoing SMS messages and the latest version supports PIN message forwarding and replying too.

It's simple to set up and easy to use. Download it from <http://txtfwd.com> , install it, launch it and set Enabled to Yes and you're done.

It will run in the background until you select Stop and Exit from the menu. It will automatically restart after a reset.

Menu Options

You can change the email address to forward to or even set it to a Mobile number. You can choose whether you want both sent and received messages forwarded and you can forward using your own email service (Forward direct from phone) or via the EP service.

Features and benefits:

- See who's texting you from your desktop.
- Reply to SMS messages direct from your desktop.
- Keep a backup of sent and received text messages via your email account.
- Don't lose SMS when changing phone numbers or juggling two phones, simply forward to email.
- Forward PIN messages too.
- Forward to another Mobile via SMS (enter number instead of email for the Address).
- Maintain audit trail of all your employees business txt transactions (orders etc.)
- Compatible with all email accounts, e.g. Outlook, Gmail, AIM, Hotmail, Yahoo! etc.
